

Product code:
FL-NA-250- 21B

Volume:
250ml

Dimensions:
Height: 138,5 mm
Diameter: 55mm
Neckfinish: 38mm 3starter
Weight: 20,5 Gramm

Appearance:
transparent and shiny

Applications:
Foods (solid, liquid),
cosmetics, detergents

**Maximum operating
temperature: 55°C**

DATA

NAKU BOTTLE – BOTTLED NATURE

Polylactic acid (PLA) 250 ml bottle

Due to its 100% natural origin (lactic acid), the bottle is free from harmful substances such as BPA, plasticisers, etc.

PLA is a biodegradable thermoplastic (melttable polymer) that can be made from corn or cornstarch. The material has a high hardness and rigidity and is therefore also more brittle than PET. It is 7% lighter than PET and has a low carbon footprint compared to oil-based products.

Density: 1,24gr/cm³;

Temperature resistance: HDT B 55°C

Rigidity (modulus of elasticity): 3500 MPa
